

MICRO PIGMENTATION PRE-PROCEDURE

INFORMATION AND CARE

EYEBROW MICRO PIGMENTATION

Avoid tweezing, waxing, electrolysis, and coloring your brows for two weeks prior to the procedure if possible. This will allow your practitioner the most flexibility to achieve optimal results.

EYELINER MICRO PIGMENTATION

DO NOT WEAR CONTACT LENSES DURING OR IMMEDIATELY FOLLOWING THE PROCEDURE. Remember to bring your glasses. You may resume wearing your contact lenses as soon as your eyes return to their pretreated condition.

Do not use growth stimulants such as Latisse®, RapidLash®, or Revitalash® for at least one week prior to and one week after your eyeliner procedure

LIP MICRO PIGMENTATION

If you have any history of cold sores/ fever blisters/ herpes simplex, you must contact your physician to Micro Pigmentation (semi-permanent makeup) procedures are affected by the "canvas" (your skin) that they are performed on. Lifestyle, medications, smoking, metabolism, facial surgery and other procedures, and age of skin all contribute to fading. The initial application is always applied conservatively because every person's skin is different and the final color can only be precisely determined and adjusted during a follow-up appointment after the initial application has fully healed. Because of this, the Micro Pigmentation process is not complete after the initial procedure. In all cases, a follow-up appointment is required approximately 30 days after your initial application to fine tune and ensure the best result.

GENERAL PRE-PROCEDURE CARE AND INFORMATION

ALL SEMI-PERMANENT COSMETIC PROCEDURES ARE MULTI-SESSION PROCESSES. An initial application is incomplete until after a follow-up appointment, which must be scheduled approximately 4-8 weeks after your initial appointment. There is no additional charge for the follow-up appointment after your initial application as long as it is performed within three months of the initial application.

WHILE YOUR SKIN HEALS, BE PREPARED FOR THE COLOR INTENSITY OF YOUR PROCEDURE TO BE SIGNIFICANTLY LARGER, SHARPER, BRIGHTER, OR DARKER than what is expected for the final outcome. This is a normal and expected result of the application and healing process. The healing process will take a number of days to complete, depending on how quickly the outer layer of your skin exfoliates and new skin regrows to take its place.

Since delicate skin or sensitive areas may swell slightly or redden, some clients feel it best not to make social plans for a day or two following any procedure. Wear your normal makeup and bring your lip or brow pencils with you the day of the procedure.

I UNDERSTAND AND ACCEPT THAT FAILURE TO FOLLOW THE POST-PROCEDURE INSTRUCTIONS ABOVE MAY RESULT IN A LOSS OR DISCOLORATION OF PIGMENT RESULTING IN A NEED FOR MORE FREQUENT TOUCHUPS.
